

I'll better do my Linear Algebra homework

Oh, that formulas looks weird. What do I have to do with the "2"? I'm gonna fail my test tomorrow!

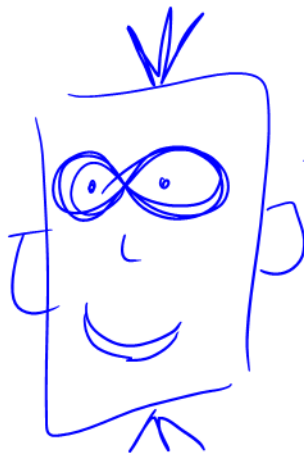

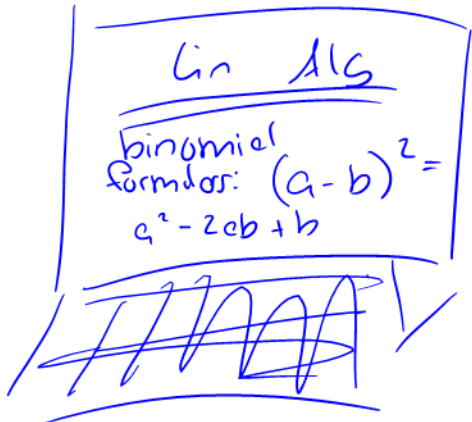

Why do you look so sad?

This viewer is useless. I don't know how to use the formulas.

Why don't you use the Hint - viewer? It breaks at the right position and you cannot learn wrong formulas.

This is great! I'll never use any other viewer, ever again.

And I'll definitely ace the test tomorrow!
